

About the MINI FARMS Website:

The URL (address) to the website is <http://www.citrusminifarms.com>

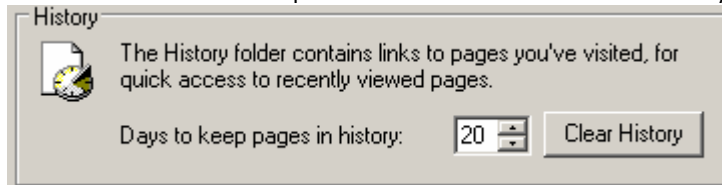

A few things that are CRITICAL in successfully accessing the website:

- There can NOT be any SPACES in the URL (address): citrusminifarms.com
- URLs are NOT case sensitive, so you could type WwW.citRusMINIfarms.Com or www.CITRUSminiFarms.com or any combination and it will get to the site.
- Spelling is CRITICAL to getting to any site, you MUST spell it correctly or you will not get there. It is recommended that you add the website address to your Favorites so that you don't need to worry about misspelling or typos. Simply go to menu item Favorites → Add Favorites on the toolbar while on the website and its URL will be added to the Favorites list. Then you can just click the Favorites button  Favorites and your list of favorite websites will show in a small window on the page. Simply click on the website URL and you're there.
- The website is changing often as new events and other things are added, dates changed and general maintenance is happening. It is CRITICAL that you Refresh the page you are on periodically to get the most current information on the page. This is particularly true for calendars and classifieds. There are 2 ways you can do this:

1. Click the Refresh button on the browser toolbar:

2. Go to menu item Tools → Internet Options and click the Clear History button in the History area

of the window:

History is a list of all of the pages you have visited in a certain number of days (20 days in the image above). The page doesn't change when you go to it, instead, it is kept in memory to make it faster to bring up pages you visit often. This is fine for static pages (they don't change often), but, for the Mini Farms website, events and classifieds and other website maintenance is going on all the time, so, you need to refresh or clear history often to see new changes.

- READ the directions on the page before reporting a problem with the page. You can't just type into a window on the website and have it be there permanently, websites just don't work that way. There is a Webmaster link somewhere on the page that you can click and send an email to the webmaster to submit something for the website, like a classified ad or an event.
- If you are SURE you are experiencing a problem on the website, or find a typo, feel free to click the Webmaster link on any page and send the page name and what the error/problem is. Again, be sure to read the whole page before assuming there is a problem or error.

We hope these hints will help you better navigate the new Citrus Mini Farms website. Enjoy!
